

Hindi Vidya Prachar Samiti's
Ramniranjan Jhunjhunwala College of Arts, Science & Commerce
(Autonomous College)

Affiliated to
UNIVERSITY OF MUMBAI

Syllabus for the F.Y.B.Sc.

Program: B.Sc. INFORMATION TECHNOLOGY

Program Code: RJSUIT

(CBCS 2021-22)

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

THE PREAMBLE

Why IT?

The world around us is rapidly changing! The change is carried by the technology. Information Technology has become the fourth basic need of human after food, shelter and clothing. Be it buying essentials online; connecting to friends and family; online learning or entertainment; IT is integral part of normal life. IT has really become the “New Normal”. The increasing popularity and luxury turning into necessity has created a large number of opportunities in the field of Information Technology.

Information Technology is an application-oriented program where students learn core technologies and apply their skills in developing solutions for different problems in a variety of domains. The applications may lead students to master a niche skill and bag a unique career opportunity. Core technology areas covered, to name a few are Mathematics, Statistics, Logic, Digital Electronics and Computer Science. To name a few technology areas covered in the UG IT program – Programming, Digital Logic circuits, Operating Systems, Discrete Mathematics, Database Management systems, Networking, Internet Security, Software Engineering, Embedded Systems, Mobile app development, Business Intelligence, GIS etc.

Why IT at R J College?

Department of IT was established in the year 2007-08. Since its inception, department has been center of attention of the college with vibrant activities and several success stories of their students. Strength of the department is talented, experienced faculty members, state of the art laboratories, rich in resource departmental library, hardworking students and a very strong industrial connect. The PG program started in the year 2016 and has received excellent response. In the journey of 15 years, students of department of IT secured top rank in university examinations in both UG and PG programs. Department of Biotechnology (DBT), New Delhi has granted DBT star scheme grant to the department of IT jointly with department of Computer Science.

At RJIT, a special attention is given to the overall grooming of the students and making them industry – ready. SkillUp, mentor mentee program of the department, facilitates every student to have personal attention of the faculty members, where academic interests and opportunities for the students are discussed on regular basis. Various options of online learning and certification are discussed with students and they are also mentored about internships available on different authentic platforms.

TechConnect is an initiative of the department where expert alumni members share their

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

expertise and experiences with the students. Communication skill of the students is polished through various activities including presentations of case studies and project work. RJIT hosts an intercollegiate techfest, "Symposium" every alternate year, where students get a good opportunity to develop leadership qualities, organizing skills and showcase their talent. Faculty being the core strength of the education system, there have been many collaborations with giants like Patni computers for strengthening our faculty in the past. Faculty members regularly undergo trainings on different new technologies to keep up with ever changing, dynamic IT field.

Placement of our students is considered most important and they are trained vigorously not only in technical skills but also in communication skill and personality development. A consistent effort from the department, in association with the always proactive placement cell of the college has seen excellent results and our students are placed in most reputed IT companies in India, TCS, Wipro, Capgemini, LTI, TechMahendra and Infosys to name a few.

Our Curriculum Your Strength

Department of IT has been instrumental in incorporating new technologies in teaching learning process as per the needs and standards of the industry. After receiving autonomy, new tools and techniques are being added, on regular interval.

The syllabus of BSc IT program is divided into six semester and systematically includes all aspects of technologies in the field of Information Technology. Semester I and II cover the foundation of most of the technologies covered during the course. Practical component added with each course, ensures sound understanding and application of the concepts learnt in theory. A case study or a small project done by the students from time to time ensures thorough knowledge and understanding of the subject.

Value added courses are meticulously designed for the students to gain extra knowledge in new and upcoming technologies. These courses not only make the students rich in knowledge but also give them additional credit points ensuring an edge over other learners.

New practical components like the study of Arduino uno or light weight handy mobile app development using the App inventor make the students agile in use of latest technology. The syllabus sees constant upgrade through brainstorming sessions with industry experts and teaching experts from different universities.

The students of RJIT learn new technologies and most importantly they learn to learn new

technology. This is the most required learning skill which will take them very far in the ever-changing world of technology.

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II**Eligibility**

A candidate for being eligible for admission to the degree course of Bachelor of Science- Information Technology, shall have passed XII standard examination of the Maharashtra Board of Higher Secondary Education or it's equivalent with Mathematic and Statistics as one of the subject and should have secured not less than 45% marks in aggregate for open category and 40% marks in aggregate in case of Reserved category candidates.

**COURSE STRUCTURE
SEMESTER I**

| Course | Nomenclature | Credits | Topics |
|---------------|--------------------------------------|----------------|---|
| RJSUIT101 | Imperative Programming | 2 | <ul style="list-style-type: none"> • Basic Programming Concepts • Arrays, Pointers and Structures |
| RJSUIT102 | Digital Electronics | 2 | <ul style="list-style-type: none"> • Numbering system and Boolean Algebra • Sequential and combinational Logic |
| RJSUIT103 | Operating Systems | 2 | <ul style="list-style-type: none"> • Basic OS concepts • Virtualization concepts |
| RJSUIT104 | Discrete Mathematics | 2 | <ul style="list-style-type: none"> • Set Theory, Number theory and related concepts • Graphs, Trees and Probability |
| RJSUIT105 | Communication Skills | 2 | <ul style="list-style-type: none"> • Business Communication • Soft Skills & Communication Needs |
| RJSUSEC106 | Professional Ethics and Human Values | 1 | <ul style="list-style-type: none"> • Human Values • Social Responsibilities and Awareness |
| RJSUITP101 | Imperative Programming Practical | 2 | |
| RJSUITP102 | Digital Electronics Practical | 2 | |
| RJSUITP103 | Operating Systems Practical | 2 | |
| RJSUITP104 | Discrete Mathematics Practical | 2 | |
| RJSUITP105 | Communication Skills Practical | 2 | |
| Total | | 21 | |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II**SEMESTER II**

| Course | Nomenclature | Credits | Topics |
|---------------|---|----------------|---|
| RJSUIT201 | Python Programming | 2 | <ul style="list-style-type: none"> • Basic Programming Concepts. • Functions, Lists, Tuples, Dictionaries. • Object Oriented Concepts using python • Regular Expressions. |
| RJSUIT202 | Microprocessor Architecture | 2 | <ul style="list-style-type: none"> • 8-bit Microprocessor architecture and Assembly Language • Next Generation Microprocessors |
| RJSUIT203 | Web Programming | 2 | <ul style="list-style-type: none"> • Internet and WWW • HTML, PHP, JavaScript and MySQL |
| RJSUIT204 | Numerical and Statistical Methods | 2 | <ul style="list-style-type: none"> • Mathematical Modeling and Engineering Problem Solving • Regression, Linear Programming and • Probability distribution |
| RJSUIT205 | Green Computing | 2 | <ul style="list-style-type: none"> • Issues and Minimizing Power usage • Going Paperless, Recycling and Greening |
| RJSUITP201 | Python Programming Practical | 2 | |
| RJSUITP202 | Microprocessor Architecture Practical | 2 | |
| RJSUITP203 | Web Programming Practical | 2 | |
| RJSUITP204 | Numerical and Statistical Methods Practical | 2 | |
| RJSUITP205 | Green Computing Practical | 2 | |
| RJSUITP206 | Minor Project | 1 | <ul style="list-style-type: none"> • Implement programming / designing skills |
| Total | | 21 | |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II**Mapping of the courses to employability / entrepreneurship / skill development****SEMESTER I**

| Course Code | Course Name | Unit wise topics focusing on Employability / Entrepreneurship / Skill development |
|--------------------|--------------------------------------|---|
| RJSUIT101 | Imperative Programming | Skill Enhancement Unit I : Expressions and constants using basic data types Unit II : Effective use of operators and Expressions Unit III : Using functions for reusability of code Unit V : Use of Pointers, Structures and Unions , Working with file |
| RJSUIT102 | Digital Electronics | Skill Enhancement Unit II : Boolean Algebra, designing circuits with minimum ICs and gates. Unit III : Implementation of logic circuits for real life problems. |
| RJSUIT103 | Operating Systems | Skill Enhancement Unit II : Effective Memory Management, File Systems Unit III : Deadlocks, detection and prevention Unit V : Case Study on LINUX and ANDROID, Case Study on Windows |
| RJSUIT104 | Discrete Mathematics | Skill Enhancement Unit IV : Graphs and Trees, Relations implementation of techniques in problem solving |
| RJSUIT105 | Communication Skills | Skill Enhancement Unit I : Understanding Business Communication Unit II: Writing Business Messages and Documents, Presentation Process Unit III : Developing Oral Communication Skills for Business -Interviews, Meetings Unit IV : Developing Oral Communication Skills for Group Discussions and Team Presentations, Communication Across Functional Areas Unit V: Understanding Specific Communication Needs |
| RJSUISEC101 | Professional Ethics and Human Values | Skill Enhancement Unit I : Human Values Unit II: Engineering Ethics Unit III: Social Responsibilities and Awareness Case Study Based Assignment |
| RJSUITP101 | Imperative Programming Practical | Skill Enhancement Practical 1 - 6 |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | | |
|------------|--------------------------------|--|
| | | <p>Writing basic programs to perform mathematical and logical operations using C++ Programming Language Practical – 7, 8 Implementation of data structures – array, structures & unions using C++ Practical 9 Implementation of pointers Practical 10 Implement file handling techniques using C++</p> |
| RJSUITP102 | Digital Electronics Practical | <p>Skill Enhancement Practical 2 & 3 Reducing Boolean expressions and building logic circuits using gates Practical 4 Implementation of code converters Practical 5, 6, 7 Implementation of combinational circuits for arithmetic and logic operation Practical 8, 9, 10 Implementation of sequential circuits like flip flops and counters</p> |
| RJSUITP103 | Operating Systems Practical | <p>Skill Enhancement, Employability Practical 1 Installation of Virtual Machines and OS – Linux, Windows Practical 4, 5, 6, 7 Linux commands and DOS commands Practical 10 Installing utility software on windows and linux</p> |
| RJSUITP104 | Discrete Mathematics Practical | <p>Skill Enhancement Practical 1 Implementation of set theory Practical 2 Implementation of built in functions in scilab Practical 4 , 5 Implementation of Probability theory, Graph theory</p> |
| RJSUITP105 | Communication Skills Practical | <p>Skill Enhancement, Employability Practical 2 Effective Communication Practical 7 Using tools for business communication Practical 9 Presentation skills</p> |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II**SEMESTER II**

| Course | Course Name | Unit wise topics focusing on Employability / Entrepreneurship / Skill development |
|---------------|-----------------------------------|--|
| RJSUIT201 | Python Programming | Skill Enhancement: Unit II – Using Python Functions, String operations Unit IV – Implementation of Object Oriented Concepts using python Unit V - Regular Expressions. |
| RJSUIT202 | Microprocessor Architecture | Skill Enhancement Unit II & III: Writing assembly language programs for 8085 microprocessor Unit IV : Study of Software Development System and Unit V : study of advanced microprocessors like 80386 and 80486, SPARC and Pentium |
| RJSUIT203 | Web Programming | Skill Enhancement, Employability Unit II: Use of HTML5 to design Forms and Media Unit III : Use of JavaScript, Operators, Statements, Document and its associated objects, Events and Event Handlers Unit IV : Using PHP Unit V :Advanced PHP concepts and MySQL |
| RJSUIT204 | Numerical and Statistical Methods | Skill Enhancement Unit I :Mathematical Modeling and Engineering Problem Solving, Approximations and Round-Off Errors Truncation Errors Unit II: Solutions of Algebraic and Transcendental Equations, Interpolation Unit IV :Least-Squares Regression, Linear Programming Unit V : Probability distributions |
| RJSUIT205 | Green Computing | Skill Enhancement, Employability Unit II: Techniques to Minimize Power Usage Unit III : Changing the Way of Work, Going Paperless Unit V :Greening Your Information Systems, Staying Green |
| RJSUITP201 | Python Programming Practical | Skill Enhancement, Employability Practical 1 to 5 Use of python programming language to use functions to work with data structure Practical 6 Use of python programming language for file handling |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | | |
|------------|--|--|
| | | Practical 7 Using python for object oriented programming Practical 8 Use python programming for exception handling Practical 9 Use python with Database |
| RJSUITP202 | Microprocessor Architecture Practical | Skill Enhancement Practical 1, 2, 4, 5 Arithmetic, Logical operations, code conversions Practical 3 Code conversion Practical 8 String operation Practical 9 Assembly programs with subroutines |
| RJSUITP203 | Web Programming Practical | Skill Enhancement, Employability Practical 1, 2 Creating simple web page with different elements Practical 3, 4 Using JavaScript Practical 5, 6, 7, 8 Using PHP for basic and advanced operations using database Practical 9 Creating a program to send Email attachment Practical 10 Demonstration of sessions and cookies |
| RJSUITP204 | Numerical and Statistical Methods Practical | Skill Enhancement Practical 3 Implementation of interpolation Practical 8 Implementation of linear and non linear regression Practical 9, 10 Implementation of probability distribution |
| RJSUITP205 | Green Computing Practical | Skill Enhancement, Employability Case study on topics like Reducing carbon footprint, E-waste recycling, Energy conservation, Water conservation and purification |
| RJSUSEC201 | Minor Project | Skill Enhancement, Employability |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| B.Sc. (Information Technology) | | Semester-I | |
|--|---------------------------|------------------------------|--------------|
| Course Name: Imperative Programming | | Course Code:RJSUIT101 | |
| Periods per week (1 Period is 50 minutes) | | 5 | |
| Credits | | 2 | |
| | | Hours | Marks |
| Evaluation System | Theory Examination | 2 | 60 |
| | Internal | 1 | 40 |

| Unit | Details | Lect ures |
|-------------|---|------------------|
| I | <p>Introduction: Simple program logic, program development cycle, algorithms, pseudo code, flowchart, Structure of a program, Preprocessor directive - #define and #include, Compilation and Execution of a Program.</p> <p>Tokens, Data Types, Expressions and constants: Tokens, identifiers, keywords, data types – basic, user defined and derived, type casting, constants – symbolic and defined, variables - declarations, initialization and use, expressions – operators & operator precedence, macros</p> | 12 |
| II | <p>Types of Operators: Arithmetic operators, Assignment operators, relational operators, logical operators, Boolean operators, increment and decrement operators, conditional operators and special operators.</p> <p>Data Input and output: Single character input and output, Accepting user input and displaying output, manipulators.</p> <p>Control Statements: Decision Making Within A Program, Conditions, If Statement, If-Else Statement, Switch Statement</p> <p>Iterative statements: While Loop, Do While, For Loop, Nested Loops, Infinite Loops.</p> | 12 |
| III | <p>Arrays: Declaration, definition and initialization of an array, accessing array elements, multidimensional arrays.</p> <p>Functions: Overview, built in and user defined functions, function prototype, function definition, function call - call by value, call by reference, return by reference, default arguments, constant arguments, Function Overloading, recursive function, passing arrays to functions, returning array from function.</p> | 12 |
| IV | <p>Storage classes: automatic, external, static and register storage classes.</p> <p>Structures, Unions and Enumerations: Structure Variables, Initialization, Assignment, Structures and Functions, Structures and Arrays, Arrays of Structures, Unions, Enumerations.</p> | 12 |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | | |
|----------|--|-----------|
| V | Pointers: declaration, initialization, pointer expressions, pointer arithmetic, pointers and strings. Working with Files: Classes for file stream operations, opening a file, closing file, reading a file, writing into a file. File pointers and their manipulations, Sequential Input and Output operations, Updating a file, Error Handling during file operations. | 12 |
|----------|--|-----------|

| | | | |
|--|------------------------------|-------------------------------|--------------|
| B.Sc.(Information Technology) | | Semester-I | |
| Course Name: Imperative Programming Practical | | Course Code:RJSUITP101 | |
| Periods per week(1 Period is 50 minutes) | | 3 | |
| Credits | | 2 | |
| | | Hours | Marks |
| Evaluation System | Practical Examination | 2½ | 50 |
| | Internal | -- | -- |

| Practical No. | Details |
|----------------------|--|
| 1. | Basic Programs: |
| a) | Write a program to declare some variables of type int, float and double. Assign some values to these variables, type cast them and display these values. |
| b) | Write a program to use different types of operators. |
| 2. | Programs on variables |
| a) | Write a program to swap two numbers with and without using third variable. |
| b) | Write a program to find the area of rectangle, square and circle. Also find the volume of a cube, sphere, and cylinder. |
| 3. | Conditional statements and loops(basic) |
| a) | Write a program to check whether the number is even or odd. Also check whether the number is positive, negative or zero. |
| b) | Write a program to find the factorial of a number. |
| c) | Write a program to find the largest of three numbers.(Note:- Use conditional operator). |
| d) | Write a program to enter a number from the user and display the month name. If number > 13 then display invalid input using switch case |
| e) | Write a program to check whether the entered number is prime or not. |
| 4. | Conditional statements and loops(advanced) |
| a) | Write a program to find the sum of squares of digits of a number. |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | |
|-----------|---|
| b) | Write a program to check whether the entered number is Armstrong or not. |
| c) | Write a program to print the Fibonacci series. |
| d) | Write a program to find the reverse of a number. |
| e) | Write a program to find whether a given number is palindrome or not. |
| f) | Write a program to count the digit in a number |
| 5. | Programs on patterns: |
| a) | Programs on different patterns. |
| 6. | Functions: |
| a) | Programs on Functions. |
| b) | Write a program to find the factorial of a number using a recursive function. |
| c) | Write a program to find the sum of natural numbers using a recursive function. |
| 7. | Arrays |
| a) | Write a program to find the largest value that is stored in the array. |
| b) | Write a program using pointers to compute the sum of all elements stored in an array. |
| c) | Write a program to arrange the 'n' numbers stored in the array in ascending and descending order. |
| d) | Write a program that performs addition and subtraction of matrices. |
| 8. | Structures and Unions |
| a) | Programs on structures. |
| b) | Programs on unions. |
| 9. | Pointers |
| a) | Write a program to demonstrate the use of pointers. |
| b) | Write a program to perform addition and subtraction of two pointer variables. |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | |
|------------|--|
| 10. | File Handling |
| a) | Write a program to write content into a file. |
| b) | Write a program to read a file and copy its content in another file. |

| | |
|--|--|
| F.Y. B.Sc. I.T. | Semester I Theory |
| RJSUIT101 Imperative Programming | <p>Course Outcomes :</p> <p>The Course will enable the student</p> <ol style="list-style-type: none"> 1. To understand programming languages and problem solving techniques. 2. To develop programming skills using the fundamentals and basics of C++ Language. 3. To effectively use arrays, structures, functions, pointers and File handling. 4. To develop logics to help them in creating programs and applications in C++. <p>Learning outcomes:</p> <ul style="list-style-type: none"> ➤ After the completion of this course, the students will be able to develop programs and small applications. |
| RJSUITP101 Imperative Programming Practical | <p>Course Outcomes :</p> <ol style="list-style-type: none"> 1. Problem solving using standard programming techniques and Turbo C compiler |

| Practical No. | Details |
|----------------------|---|
| 1. | Study of Logic gates and their ICs and universal gates: |
| a. | Study of AND, OR, NOT, XOR, XNOR, NAND and NOR gates |
| b. | IC7400, 7402, 7404, 7408, 7432, 7486, 74266 |
| c. | Implement AND, OR, NOT, XOR, XNOR using NAND gates. |
| d. | Implement AND, OR, NOT, XOR, XNOR using NOR gates. |
| 2. | Implement the given Boolean expressions using a minimum number of gates. |
| a. | Verifying De Morgan's laws. |
| b. | Implement other given expressions using a minimum number of gates. |
| c. | Implement other given expressions using a minimum number of ICs. |
| 3. | Implement combinational circuits. |
| a. | Design and implement combinational circuits based on the problem given and minimizing using K-maps. |
| 4. | Implement code converters. |
| a. | Design and implement Binary-to-Gray code converter. |
| b. | Design and implement Gray-to-Binary code converter. |
| c. | Design and implement Binary-to-BCD code converter |
| 5. | Implement Adder and Subtractor Arithmetic circuits. |
| a. | Design and implement Half adder and Full adder. |
| b. | Design and implement BCD adder. |
| d. | Design and implement binary subtractor. |
| e. | Design and implement BCD subtractor. |
| 6. | Implement Arithmetic circuits. |
| a. | Design and implement a 2-bit by 2-bit multiplier. |
| b. | Design and implement a 2-bit comparator. |
| 7. | Implement Encode and Decoder and Multiplexer and Demultiplexers. |
| a. | Design and implement 8:3 encoder. |
| b. | Design and implement 3:8 decoder. |
| c. | Design and implement 4:1 multiplexer. Study of IC 74153, 74157 |
| d. | Design and implement 1:4 demultiplexer. Study of IC 74139 |
| e. | Implement the given expression using IC 74151 8:1 multiplexer. |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | |
|------------|---|
| 8. | Study of flip-flops and counters. |
| a. | Study of IC 7473. |
| b. | Study of IC 7474. |
| c. | Study of IC 7476. |
| d. | Conversion of Flip-flops. |
| e. | Design of 3-bit synchronous counter using 7473 and required gates. |
| f. | Design of 3-bit ripple counter using IC 7473. |
| 9. | Study of counter ICs and designing Mod-N counters. |
| a. | Study of IC7490, 7492, 7493 and designing mod-n counters using these. |
| b. | Designing mod-n counters using IC 7473 and 7400 (NAND gates) |
| 10. | Design of shift registers and shift register counters. |
| a. | Design serial – in serial – out, serial – in parallel–out, parallel–in serial–out, parallel – in parallel – out and bidirectional shift registers using IC7474. |
| b. | Study of ID 7495. |

| I | Introduction: What is an operating system? History of operating system, computer hardware, different operating systems, operating system concepts, system calls, operating system structure. Processes and Threads: Processes concept, Process scheduling, Operations on processes, Inter process communication, IPC problems, Threads-usage, classical thread model, implementing threads in user and kernel space. | 12 |
| II | Memory Management: Swapping, Contiguous memory Allocation, Paging, Page table structure, Page Replacement Algorithm, Design Issues of Paging, Segmentation, Virtual Memory and Implementation Issues. File Systems: Files, directories, file system implementation, file-system management and optimization, MS-DOS file system, UNIXV7 file system, CDROM file system. | 12 |
| III | Input-Output: Principles of I/O hardware, Application I/ O Interface, Kernel I/O Subsystems, Streams, disks, clocks, power management. Deadlocks: Resources, introduction to deadlocks, the ostrich algorithm, deadlock detection and recovery, deadlock avoidance, deadlock prevention, issues. | 12 |
| IV | Virtualization and Cloud: History, requirements for virtualization, type1 and 2 hypervisors, techniques for efficient virtualization, hypervisor microkernels, memory virtualization, I/O virtualization, Virtual appliances, virtual machines on multicore CPUs, Clouds. Multiple Processor Systems, Multiprocessors, multi computers, distributed systems. | 12 |
| V | Case Study on LINUX and ANDROID: History of Unix and Linux, Linux Overview, Processes in Linux, Memory management in Linux, Linux file system, security in Linux. Android Case Study on Windows: History of windows through Windows10, system structure, processes and threads in windows, memory management, caching in windows, Windows NT file system. | 12 |

| B.Sc.(Information Technology) | | Semester–I | |
| Course Name: Operating Systems Practical | | Course Code:RJSUITP103 | |
| Periods per week(1 Period is 50 minutes) | | 3 | |
| Credits | | 2 | |
| | | Hours | Marks |
| Evaluation System | Practical Examination | 2½ | 50 |
| | Internal | -- | -- |

| Practical No. | Details |
|----------------------|--|
| 1. | Installation of virtual machine software. |
| 2. | Installation of Linux operating system (RedHat/Ubuntu) on virtual machine. |
| 3. | Installation of Windows operating system on virtual machine. |
| 4. | Linux commands: Working with Directories: |
| a. | pwd, cd, absolute and relative paths, ls, mkdir, rmdir, |
| b. | file, touch, rm, cp.mv, rename, head, tail, cat, tac, more, less, strings, chmod |
| 5. | Linux commands: Working with files: |
| a. | ps, top, kill, pkill, bg, fg, |
| b. | grep, locate, find, locate. |
| c. | date,cal,uptime,w,whoami,finger,uname,man,df,du,free,whereis,which. |
| d. | Compression: tar, gzip. |
| 6. | Windows (DOS) Commands–1 |
| a. | Date, time, prompt, md, cd, rd, path. |
| b. | Chkdsk, copy, xcopy, format, fidsk, cls, defrag, del, move. |
| 7. | Windows (DOS) Commands–2 |
| a. | Diskcomp, diskcopy, diskpart, doskey, echo |
| b. | Edit, fc, find, rename, set, type, ver |
| 8. | Working with Windows Desktop and utilities |
| a. | Notepad |
| b. | Wordpad |
| c. | Paint |
| d. | Taskbar |
| e. | Adjusting display resolution |
| f. | Using the browsers |
| g. | Configuring simple networking |
| h. | Creating users and shares |
| 9. | Working with Linux Desktop and utilities |
| a. | The vi editor. |
| b. | Graphics |
| c. | Terminal |
| d. | Adjusting display resolution |

| | | | |
|---|---------------------------|-------------------------------|--------------|
| B.Sc.(Information Technology) | | Semester–I | |
| Course Name: Discrete Mathematics | | Course Code: RJSUIT104 | |
| Periods per week(1 Period is 50 minutes) | | 5 | |
| Credits | | 2 | |
| | | Hours | Marks |
| Evaluation System | Theory Examination | 2 | 60 |
| | Internal | 1 | 40 |

| Unit | Details | Lect ures |
|-------------|---|------------------|
| I | Set Theory: Definitions and the Element Method of Proof, Properties of Sets, Disproof's, Algebraic Proofs, Boolean Algebras The Logic of Compound Statements: Logical Form and Logical Equivalence, Conditional Statements, Valid and Invalid Arguments Quantified Statements: Predicates and Quantified Statements, Statements with Multiple Quantifiers, Arguments with Quantified Statements. | 12 |
| II | Elementary Number Theory and Methods of Proof: Introduction to Direct Proofs, Rational Numbers, Divisibility, Division into Cases and the Quotient-Remainder Theorem, Floor and Ceiling. Indirect Argument: Contradiction and Contraposition, Two Classical Theorems, Applications in algorithms. | 12 |
| III | Sequences, Mathematical Induction, and Recursion: Sequences, Mathematical Induction, Strong Mathematical Induction and the Well Ordering Principle for the Integers, Correctness of algorithms, defining sequences recursively, solving recurrence relations by iteration, Second order linear homogenous recurrence relations with constant coefficients. general recursive definitions and structural induction. Functions: Functions Defined on General Sets, One-to-One and Onto, Inverse Functions, Composition of Functions, Cardinality with Applications to Computability. | 12 |
| IV | Graphs and Trees: Definitions and Basic Properties, Trails, Paths, and Circuits, Matrix Representations of Graphs, Isomorphism's of Graphs, Trees, Rooted Trees, Isomorphism's of Graphs, Spanning trees and shortest paths. Relations: Relations on Sets, Reflexivity, Symmetry, and Transitivity, Equivalence Relations, Partial Order Relations | 12 |
| V | Counting and Probability: Introduction, Possibility Trees and the Multiplication Rule, Possibility Trees and the Multiplication Rule, Counting Elements of Disjoint Sets: The Addition Rule, The Pigeonhole Principle, Counting Subsets of a Set: Combinations, rCombinations with Repetition Allowed, Probability Axioms and Expected Value, Conditional Probability, Bayes' Formula, and Independent Events. | 12 |

| | | | |
|--|------------------------------|--------------------------------|--------------|
| B.Sc.(Information Technology) | | Semester-II | |
| Course Name: Python Programming Practical | | Course Code: RJSUITP201 | |
| Periods per week(1 Period is 50 minutes) | | 3 | |
| Credits | | 2 | |
| | | Hours | Marks |
| Evaluation System | Practical Examination | 2½ 2 | 50 |
| | External | -- | -- |

| Practical No | Details |
|--------------|---|
| 1. | Write the program for the following: |
| a. | Create a program that asks the user to enter their name and their age. Print out a message addressed to them that tells them the year that they will turn 100 years old. |
| b. | Enter the number from the user and depending on whether the number is even or odd, print out an appropriate message to the user. |
| c. | Write a program to generate the Fibonacci series. |
| d. | Write a function that reverses the user defined value. |
| e. | Write a function to check the input value is Armstrong and also write the function for Palindrome. |
| f. | Write a recursive function to print the factorial for a given number. |
| 2. | Write the program for the following: |
| a. | Write a function that takes a character (i.e. a string of length 1) and returns True if it is a vowel, False otherwise. |
| b. | Define a function that computes the <i>length</i> of a given list or string. |
| c. | Define a <i>procedure</i> histogram() that takes a list of integers and prints a histogram to the screen. For example, histogram([4, 9, 7]) should print the following: **** ***** ***** |
| 3. | Write the program for the following: |
| a. | A <i>pangram</i> is a sentence that contains all the letters of the English alphabet at least once, for example: <i>The quick brown fox jumps over the lazy dog</i> . Your task here is to write a function to check a sentence to see if it is a pangram or not. |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | |
|----|---|
| b. | Take a list, say for example this one: a=[1,1,2,3,5,8,13,21,34,55,89] and write a program that prints out all the elements of the list that are less than 5 |
| 4. | Write the program for the following: |
| a. | Write a program that takes two lists and returns True if they have at least one common member. |
| b. | Write a Python program to print a specified list after removing the 0th, 2nd, 4th and 5th elements. |
| c. | Write a Python program to clone or copy a list |
| 5. | Write the program for the following: |
| a. | Write a Python script to sort (ascending and descending) a dictionary by value. |
| b. | Write a Python script to concatenate following dictionaries to create a new one. Sample Dictionary : dic1={ 1:10, 2:20} dic2={ 3:30, 4:40} dic3={ 5:50,6:60} Expected Result : {1: 10, 2: 20, 3: 30, 4: 40, 5: 50, 6: 60} |
| c. | Write a Python program to sum all the items in a dictionary. |
| 6. | Write the program for the following: |
| a. | Write a Python program to read an entire text file. |
| b. | Write a Python program to append text to a file and display the text. |
| c. | Write a Python program to read last n lines of a file. |
| 7. | Write the program for the following: |
| a. | Design a class that store the information of student and display the same |
| b. | Implement the concept of inheritance using python |
| c. | Create a class called Numbers, which has a single class attribute called MULTIPLIER, and a constructor which takes the parameters x and y (these should all be numbers). i. Write a method called add which returns the sum of the attributes x and y. ii. Write a class method called multiply, which takes a single number parameter a and returns the product of a and MULTIPLIER. |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | |
|----|--|
| | iii. Write a static method called subtract, which takes two number parameters, b and c, and returns b - c. iv. Write a method called value which returns a tuple containing the values of x and y. Make this method into a property, and write a setter and a deleter for manipulating the values of x and y. |
| 8. | Write the program for the following: |
| a. | <p>Open a new file in IDLE ("New Window" in the "File" menu) and save it as geometry.py in the directory where you keep the files you create for this course. Then copy the functions you wrote for calculating volumes and areas in the "Control Flow and Functions" exercise into this file and save it.</p> <p>Now open a new file and save it in the same directory. You should now be able to import your own module like this:</p> <pre>import geometry</pre> <p>Try and add <code>print dir(geometry)</code> to the file and run it.</p> <p>Now write a function <code>pointy Shape Volume(x, y, squareBase)</code> that calculates the volume of a square pyramid if squareBase is True and of a right circular cone if squareBase is False. x is the length of an edge on a square if squareBase is True and the radius of a circle when squareBase is False. y is the height of the object. First use squareBase to distinguish the cases. Use the circleArea and squareArea from the geometry module to calculate the base areas.</p> |
| b. | Write a program to implement exception handling. |
| 9. | Design the database applications for the following: |
| a. | Design a simple database application that stores the records and retrieve the same. |

| | |
|---|--|

| | | Hours | Marks |
| Evaluation System | Theory Examination | 2 | 60 |
| | Internal | -- | 40 |

| Unit | Details | Lect ures |
|-------------|---|------------------|
| I | <p>Microprocessor, microcomputers, and Assembly Language: Microprocessor, Microprocessor Instruction Set and Computer Languages, From Large Computers to Single-Chip Micro controllers Applications.</p> <p>Microprocessor Architecture and Microcomputer System: Microprocessor Architecture and its operation's, Memory, I/O Devices, Microcomputer System, Logic Devices and Interfacing, Microprocessor-Based System Application.</p> <p>8085 Microprocessor Architecture and Memory Interface: Introduction, 8085 Microprocessor unit, 8085-Based Microcomputer, Memory Interfacing, Testing and Troubleshooting Memory Interfacing Circuit.</p> | 12 |
| II | <p>Interfacing of I/O Devices Basic Interfacing concepts, Interfacing Output Displays, Interfacing Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits.</p> <p>Introduction to 8085 Assembly Language Programming: The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, Writing assembling and Execution of a simple program, Overview of 8085 Instruction Set, Writing and Assembling Program.</p> <p>Introduction to 8085 Instructions: Data Transfer Operations, Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging a Program.</p> | 12 |
| III | <p>Programming Techniques With Additional Instructions: Programming Techniques: Looping, Counting and Indexing, Additional Data Transfer and 16-Bit Arithmetic Instructions, Arithmetic Instruction Related to Memory, Logic Operations: Rotate, Logics Operations: Compare, Dynamic Debugging.</p> <p>Counters and Time Delays: Counters and Time Delays, Illustrative Program: Hexadecimal Counter, Illustrative Program: zero-to-nine (Modulo Ten) Counter, Generating Pulse Waveforms, Debugging Counter and Time-Delay Programs.</p> <p>Stacks and Sub-Routines: Stack, Subroutine, Restart, Conditional Call, Return Instructions, Advanced Subroutine concepts.</p> | 12 |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | | |
|-----------|--|-----------|
| IV | Code Conversion, BCD Arithmetic, and 16-Bit Data Operations: BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-to-Seven-Segment-LED Code Conversion, Binary-to-ASCII and ASCII-to-Binary Code Conversion, BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry. Software Development System and Assemblers: Microprocessors- Based Software Development system, Operating System and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers. Interrupts: The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes. | 12 |
| V | Introduction to 16 bit microprocessor – 8086 : 8086 Microprocessor family overview, Features of 8086, Architecture of 8086, Bus Interface Unit, Additional Instructions in 8086, comparison between 8085 and 8086 Introduction to 32 bit microprocessor -80286, 80386 and 80486: The Intel 80286 microprocessor - Architecture, signals, New Enhanced Instructions, | |
| | The Intel 80386 microprocessor - Architecture, operating modes, enhanced instructions, Intel 80486 microprocessor - internal block diagram and functional signal groups. Introduction to Intel Pentium Processor Operating modes, Memory model, New instructions of Pentium processors, The P6 pro family processors, i3, i5, i7 processors and their features, SPARC microprocessors, Features, data types and instruction format. | 12 |

| | | | |
|---|------------------------------|--------------------------------|--------------|
| B.Sc.(Information Technology) | | Semester–II | |
| Course Name: Microprocessor Architecture Practical | | Course Code: RJSUITP202 | |
| Periods per week (1 Period is 50 minutes) | | 3 | |
| Credits | | 2 | |
| | | Hours | Marks |
| Evaluation System | Practical Examination | 2½ | 50 |
| | Internal | -- | -- |

| Practical No. | Details |
|----------------------|---|
| 1. | Perform the following Operations related to memory locations. |
| a. | Store the data byte 32 H into memory location 8000H. |
| b. | A block of data consisting of 256 bytes is stored in memory starting at 8000H. write an assembly language program to shift this block in memory from 8050H onwards. |
| c. | Exchange the contents of memory locations 8000H and 9000H |
| 2. | Simple assembly language programs for arithmetic operations. |
| a. | Add two 8 bit numbers |
| b. | Subtract the contents of memory location 8001H from the memory location 8000H and place the result in memory location 8002H. |
| c. | Add the 16-bit number in memory locations 8000H and 8001H to the 16-bit number in memory locations 8002H and 8003H. The most significant eight bits of the two numbers to be added are in memory locations 8001H and 8003H. Store the result in memory locations 8004H and 8005H with the most significant byte in memory location 8005H. |
| d. | Subtract the 16-bit number in memory locations 8002H and 8003H from the 16-bit number in memory locations 8000H and 8001H. The most significant eight bits of the two numbers are in memory locations 8001H and 8003H. Store the result in memory locations 8004H and 8005H with the most significant byte in memory location 8005H. |
| e. | Find the 1's complement of the number stored at memory location 8400H and store the complemented number at memory location 8300H. |
| f. | Find the 2's complement of the number stored at memory location 8200H and store the complemented number at memory location 8300H. |
| 3. | Packing and unpacking operations. |
| a. | Write a simple program to Split a HEX data into two nibbles and store it in memory |
| b. | Pack the two unpacked BCD numbers stored in memory locations 8200H and 8201H and store the result in memory location 8300H. Assume the least significant digit is stored at 8200H. |
| c. | Two digit BCD number is stored in memory location 8200H. Unpack the BCD number and store the two digits in memory locations 8300H and 8301H such that memory location 8300H will have a lower BCD digit. |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | |
|-----------|--|
| 4. | Register Operations. |
| a. | Write a program to shift an eight bit data four bits right. Assume that data is in register C. |
| b. | Program to shift a 16-bit data 1 bit left. Assume data is in the HL register pair |
| c. | Write a program to count the number of 1's in the contents of D register and store the count in the B register. |
| 5. | Operations with Memory locations. |
| a. | Calculate the sum of a series of numbers. The length of the series is in memory location 8200H and the series begins from memory location 8201H. a. Consider the sum to be an 8 bit number. So, ignore carries. Store the sum at memory location 8300H. b. Consider the sum to be a 16 bit number. Store the sum at memory locations 8300H and 8301H |
| b. | Calculate the sum of a series of even numbers from the list of numbers. The length of the list is in memory location 8200H and the series itself begins from memory location 8201H. Assume the sum to be 8 bit number so you can ignore carries and store the sum at memory location 8000 H |
| c. | Multiply two 8-bit numbers stored in memory locations 8200H and 8201H by repetitive addition and store the result in memory locations 8300H and 8301H. |
| d. | Divide 16 bit number stored in memory locations 8200H and 8201H by the 8 bit number stored at memory location 8202H. Store the quotient in memory locations 8300H and 8301H and remainder in memory locations 8302H and 8303H. |
| e. | Find the number of negative elements (most significant bit 1) in a block of data. The length of the block is in memory location 8200H and the block itself begins in memory location 8201H. Store the number of negative elements in memory location 8300H |
| f. | Find the square of the given numbers from memory location 8100H and store the result from memory location 9000H |
| 6. | Search and sort data with respect to memory locations. |
| a. | Write a program to sort given 10 numbers from memory location 2200H in the ascending order. |
| b. | Search the given byte in the list of 50 numbers stored in the consecutive memory locations and store the address of memory location in the memory locations 8200H and 8201H. Assume the byte is in the C register and the starting address of the list is 8000H. If byte is not found store 00 at 8200H and 8201H |
| c. | Find the largest number in a block of data. The length of the block is in memory location 2200H and the block itself starts from memory location 2201H. Store the maximum number in memory location 2300H. Assume that the numbers in the block are all 8 bit unsigned binary numbers. |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | |
|------------|---|
| 7. | Assembly programs on memory locations. |
| a. | Write an assembly language program to separate even numbers from the given list of 10 numbers and store them in another list starting from 2300H. Assume starting address of 10 number list is 2200H |
| b. | Add even parity to a string of 7-bit ASCII characters. The length of the string is in memory location 2040H and the string itself begins in memory location 2041H. Place even parity in the most significant bit of each character. |
| c. | A list of 20 numbers is stored in memory, starting at 8000H. Find number of negative, zero and positive numbers from this list and store these results in memory locations 9000H, 9001H, and 9002H respectively |
| d. | Write an assembly language program to generate Fibonacci numbers. |
| e. | Program to calculate the factorial of a number between 0 to 8. |
| 8. | String operations in assembly programs. |
| a. | Write an 8085 assembly language program to insert a string of four characters from the tenth location in the given array of 50 characters |
| b. | Write an 8085 assembly language program to delete a string of 4 characters from the tenth location in the given array of 50 characters. |
| 9. | Subroutine |
| a. | DAA instruction is not present. Write a Sub routine which will perform the same task as DAA. |
| b. | Multiply two 8-bit numbers stored in memory locations 8200H and 8201H by repetitive addition and store the result in memory locations 8300H and 8301H. Write a subroutine to store the content of carry to register B. |
| 10. | Operations on BCD numbers. |
| a. | Add two 4 digit BCD numbers in HL and DE register pairs and store the result in memory locations, 2300H and 2301H. Ignore carry after 16 bits. |
| b. | Subtract the BCD number stored in E register from the number stored in the D register |
| c. | Write an assembly language program to multiply 2 BCD numbers |

| | |

| Unit | Details | Lect ures |
|-------------|--|----------------------|
| I | <p>Internet and the World Wide Web: What is the Internet? Introduction to internet and its applications, E-mail, telnet, FTP, e-commerce, video conferencing, e-business. Internet service providers, domain name server, internet address, World Wide Web (WWW): World Wide Web and its evolution, uniform resource locator (URL), browsers–internet explorer, Netscape navigator, opera, Firefox, chrome, Mozilla. Search engine, web saver–apache, IIS, proxy server, HTTP protocol</p> <p>HTML5: Introduction, Why HTML5? Formatting text by using tags, using lists and backgrounds, Creating hyperlinks and anchors. Style sheets, CSS formatting text using style sheets, formatting paragraphs using style sheets.</p> | 12 |
| II | <p>HTML5 Page layout and navigation: Creating navigational aids: planning site organization, creating text based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map, redirecting to another URL, creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5 semantic layout, positioning and formatting divisions.</p> <p>HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column, merging table cells, using tables for page layout, formatting tables: applying table borders, applying background and foreground fills, changing cell padding, spacing and alignment, creating user forms: creating basic form, using checkboxes and option buttons, creating lists, additional input types in HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on web page.</p> | 12 |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | | |
|------------|--|-----------|
| III | <p>JavaScript: Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, Javascript Security,</p> <p>Operators: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment), --(Decrement), -(Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void</p> <p>Statements: Break, comment, continue, delete, do...while, export, for, for...in, function, if...else, import, labelled, return, switch, var, while, with,</p> <p>Core JavaScript (Properties and Methods of Each): Array, Boolean, Date, Function, Math, Number, Object, String, regExp Document and its associated objects: document, Link, Area, Anchor, Image, Applet, Layer</p> <p>Events and Event Handlers: General Information about Events, Defining Event Handlers, event, onAbort, onBlur, onChange, onClick, onDbClick, onDragDrop, onError, onFocus, onKeyDown, onKeyPress, onKeyUp, onLoad, onMouseDown, onMouseMove, onMouseOut, onMouseOver, onMouseUp, onMove, onReset, onResize, onSelect, onSubmit, onUnload</p> | 12 |
| IV | <p>PHP:</p> <p>Why PHP and MySQL? Server-side scripting, PHP syntax and variables, comments, types, control structures, branching, looping, termination, functions, passing information with PHP, GET, POST, formatting form variables, super global arrays, strings and string functions, arrays, number handling, basic PHP errors/problems</p> | 12 |
| V | <p>Advanced PHP and MySQL: PHP/MySQL Functions, Integrating web forms and databases, Displaying queries in tables, Building Forms from queries, String and Regular Expressions, Sessions, Cookies and HTTP, E-Mail</p> | 12 |

| | | Hours | Marks |
| Evaluation System | Practical Examination | 2½ | 50 |
| | Internal | -- | -- |

| Practical No. | Details |
|----------------------|---|
| 1. | Use of Basic Tags |
| a. | Design a web page using different text formatting tags. |
| b. | Design a web page with links to different pages and allow navigation between web pages. |
| c. | Design a web page demonstrating all Style sheet types |
| 2. | Image maps, Tables, Forms and Media |
| a. | Design a web page with Image maps. |
| b. | Design a web page demonstrating different semantics |
| c. | Design a web page with different tables. Design web pages using tables so that the content appears well placed. |
| d. | Design a web page with a form that uses all types of controls. |
| e. | Design a web page embedding with multimedia features. |
| 3. | JavaScript |
| a. | Using JavaScript design, a web page that prints factorial/Fibonacci series/any given series. |
| b. | Design a form and validate all the controls placed on the form using JavaScript. |
| c. | Write a JavaScript program to display all the prime numbers between 1 and 100. |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | |
|------------|---|
| a. | Write a JavaScript program to accept a number from the user and display the sum of its digits. |
| d. | Write a program in Java Script to accept a sentence from the user and display the number of words in it. (Do not use split() function). |
| e. | Write a javascript program to design a simple calculator. |
| 4. | Control and looping statements and JavaScript references |
| a. | Design a web page demonstrating different conditional statements. |
| b. | Design a web page demonstrating different looping statements. |
| c. | Design a web page demonstrating different Core JavaScript references (Array, Boolean, Date, Function, Math, Number, Object, String, regExp) |
| 5. | Basic PHP I |
| a. | Write a PHP Program to accept a number from the user and print it factorial. |
| b. | Write a PHP program to accept a number from the user and print whether it is prime or not. |
| 6. | Basic PHP II |
| a. | Write a PHP code to find the greater of 2 numbers. Accept the no. from the user. |
| b. | Write a PHP program to display the following Binary Pyramid: <pre> 1 0 1 1 0 1 0 1 0 1 </pre> |
| 7. | String Functions and arrays |
| a. | Write a PHP program to demonstrate different string functions. |
| b. | Write a PHP program to create a one dimensional array. |
| 8. | PHP and Database |
| a. | Write a PHP code to create: <ul style="list-style-type: none"> ● CreateadatabaseCollege ● Create a table Department (Dname, Dno, Number_Of_faculty) |
| b. | Write a PHP program to create a database named “College”. Create a table named “Student” with following fields (sno, sname, percentage).Insert 3 records ofyourchoice.Displaythenamesofthestudentswhosepercentageisbetween35to75 in a tabular format. |
| 9. | Email |
| a. | Write a program to send email with attachment. |
| 10. | Sessions and Cookies |
| a. | Write a program to demonstrate use of sessions and cookies |

| | |

| B.Sc.(Information Technology) | | Semester–II | |
| Course Name: Green Computing | | Course Code: RJSUIT205 | |
| Periods per week(1 Period is 50 minutes) | | 5 | |
| Credits | | 2 | |
| | | Hours | Marks |
| Evaluation System | Theory Examination | 2 | 60 |
| | Internal | -- | 40 |
| | | | |

| Unit | Details | Lect ures |
|-------------|--|------------------|
| I | <p>Overview and Issues: Problems: Toxins, Power Consumption, Equipment Disposal, Company's Carbon Footprint: Measuring, Details, reasons to bother, Plan for the Future, Cost Savings: Hardware, Power.</p> <p>Initiatives and Standards: Global Initiatives: United Nations, Basel Action Network, Basel Convention, North America: The United States, Canada, Australia, Europe, WEEE Directive, RoHS, National Adoption, Asia: Japan, China, Korea.</p> | 12 |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | | |
|------------|---|-----------|
| II | <p>Minimizing Power Usage: Power Problems, Monitoring Power Usage, Servers, Low-Cost Options, Reducing Power Use, Data Deduplication, Virtualization, Management, Bigger Drives, Involving the Utility Company, Low-Power Computers, PCs, Linux, Components, Servers, Computer Settings, Storage, Monitors, Power Supplies, Wireless Devices, Software.</p> <p>Cooling: Cooling Costs, Power Cost, Causes of Cost, Calculating Cooling Needs, Reducing Cooling Costs, Economizers, On-Demand Cooling, HP's Solution, Optimizing Airflow, Hot Aisle/Cold Aisle, Raised Floors, Cable Management, Vapour Seal, Prevent Recirculation of Equipment Exhaust, Supply Air Directly to Heat Sources, Fans, Humidity, Adding Cooling, Fluid Considerations, System Design, Data Centre Design, Centralized Control, Design for Your Needs, Put Everything Together.</p> | 12 |
| III | <p>Changing the Way of Work: Old Behaviors, starting at the Top, Process Reengineering with Green in Mind, Analysing the Global Impact of Local Actions, Steps: Water, Recycling, Energy, Pollutants, Teleworkers and Outsourcing, Telecommuting, Outsourcing, how to Outsource.</p> <p>Going Paperless: Paper Problems, The Environment, Costs: Paper and Office, Practicality, Storage, Destruction, Going Paperless, Organizational Realities, Changing Over, Paperless Billing, Hand held Computers vs. the Clipboard, Unified Communications, Intranets, What to Include, Building an Intranet, Microsoft Office SharePoint Server 2007, Electronic Data Interchange(EDI), Nuts and Bolts, Value Added Networks, Advantages, Obstacles.</p> | 12 |
| IV | <p>Recycling: Problems, China, Africa, Materials, Means of Disposal, Recycling, Refurbishing, Make the Decision, Life Cycle, from beginning to end, Life, Cost, Green Design, Recycling Companies, Finding the Best One, Checklist, Certifications, Hard Drive Recycling, Consequences, cleaning a Hard Drive, Pros and cons of each method, CDs and DVDs, good and bad about CD and DVDs disposal, Change the mind-set, David vs. America Online</p> <p>Hardware Considerations: Certification Programs, EPEAT, RoHS, Energy Star, Computers, Monitors, Printers, Scanners, All-in-Ones, Thin Clients, Servers, Blade Servers, Consolidation, Products, Hardware Considerations, Planned Obsolescence, Packaging, Toxins, Other Factors, Remote Desktop, Using Remote Desktop, Establishing a Connection, In Practice</p> | 12 |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | | |
|----------|---|-----------|
| V | <p>Greening Your Information Systems: Initial Improvement Calculations, Selecting Metrics, Tracking Progress, Change Business Processes, Customer Interaction, Paper Reduction, Green Supply Chain, Improve Technology Infrastructure, Reduce PCs and Servers, Shared Services, Hardware Costs, Cooling.</p> <p>Staying Green: Organizational Check-ups, Chief Green Officer, Evolution, Sell the CEO, SMART Goals, Equipment Check-ups, Gather Data, Tracking the data, Baseline Data, Benchmarking, Analyse Data, Conduct Audits, Certifications, Benefits, Realities, Helpful Organizations.</p> | 12 |
|----------|---|-----------|

| Books and References: | | | | | |

| Sr. No. | Title | Author/s | Publisher | Edition | Year |
| 1. | Green IT | Toby Velte, Anthony Velte, Robert Elsenpeter | McGra w Hill | | 2008 |
| 2. | Green Data Center: Steps for the Journey | Alvin Galea, Michael Schaefer, Mike Ebbers | Shroff Publishers and Distributo rs | | 2011 |
| 3. | Green Computing and Green IT Best Practice | Jason Harris | Emereo | | |
| 4. | Green Computing Tools and Techniques for Saving Energy, Money and Resources | Bud E. Smith | CRC Press | | 2014 |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | | | |
|---|------------------------------|-------------------------------|--------------|
| B.Sc.(Information Technology) | | Semester–II | |
| Course Name: Green Computing Practical | | Course Code:RJSUITP205 | |
| Periods per week(1 Period is 50 minutes) | | 3 | |
| Credits | | 2 | |
| | | Hours | Marks |
| Evaluation System | Practical Examination | 2½ | 50 |
| | Internal | -- | -- |

| Project and Viva Voce | |
|------------------------------|---|
| 1. | A project should be done based on the objectives of Green Computing. A report of minimum 50 pages should be prepared. The report should have a font size of 12, Times new roman and 1.5 line spacing. The headings should have font size 14. The report should be hard bound. |
| 2. | The project can be done individually or a group of two students. |
| 3. | The students will have to present the project during the examination. |
| 4. | A certified copy of the project report is essential to appear for the examination. |

| | |
|---|---|
| F.Y. B.Sc. I.T. | Semester II Theory |
| RJSUIT205 Green Computing | <p>Course Outcomes :</p> <ol style="list-style-type: none"> 1. Develop an understanding of the emerging problem of electronic waste and various ways to effectively handle it. 2. Various global level initiatives and standards in Green IT to help reduce the use of hazardous materials for electronics. <p>Learning outcomes:</p> <ul style="list-style-type: none"> ➤ Students understand the global level E-waste problem, power usage problem in data centres, measuring carbon footprints, and adopting various other practices like going paperless, telecommuting etc. |
| RJSUITP205 Green Computing Practical | <p>Course Outcomes :</p> <ol style="list-style-type: none"> 1. To do a small research project on any environmental related topic like, Carbon Footprint, Energy Conservation, Recycling, Data centers design for efficient energy usage, Review of Green Initiatives in India and abroad |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | | | |
|---|------------------------------|-------------------------------|--------------|
| B.Sc.(Information Technology) | | Semester–II | |
| Course Name: Mini Project Implementation | | Course Code:RJSUITP206 | |
| Periods per week(1 Period is 50 minutes) | | 2 | |
| Credits | | 1 | |
| | | Hours | Marks |
| Evaluation System | Practical Examination | 1½ | 25 |
| | Internal | -- | -- |

| Project and Viva Voce | |
|------------------------------|--|
| 1. | <p>A project should be done based on one of the technologies learned in the duration of Semester I or / and Semester II; or using any other suitable software. Sample problem definitions are given below. Students can choose the topic of their interest and develop a mini project after getting the topic approved by the respective project guide.</p> <p>Problem Statement 1 Create your own website:</p> <ol style="list-style-type: none"> 1. Define goals and objectives for your website 2. Organize content and make content list 3. Create a task list for the following – <ol style="list-style-type: none"> a. UI Design b. Database Tables c. Server side programming d. Client side programming 4. Create site design and navigation structure. <p>Students can use any technology and / or tool to build the site. Marks will be allotted to design of the website, Impressive UI design, Database design and connectivity, Client side validations.</p> <p>Problem Statement 2 Create a Python or C++ Program to create an application: Few application ideas are given below. Students can use any of the given problems, or choose a different topic with approval of their project guide.</p> <ol style="list-style-type: none"> 1. Number Guessing game: Generate a random number. Allow a user to enter their details and guess the number (number can be one digit, two digit or three digit number) Allot reward points to users if their guess is correct. User's data can be kept in a data structure / database and retrieved, if asked. Make an attractive graphical interface design for the application. 2. Word Guessing game (Hangman): create a GUI to allow the user to select a three / four / five letter word. Initially prompt the user with one alphabet. User can have a max of three chances. Each wrong answer will bring the hangman closer |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

| | |
|-----------|---|
| | <p>to the death trap. Provide one clue for the word at each chance. Database can be used to store the word and clues.</p> <p>3. Create a phonebook application using technology of your choice. This will facilitate the user to enter, search and update records. Create a suitable interface.</p> |
| 2. | The project can be done individually or a group of two students. |
| 3. | <p>The students will have to present the project during the examination. They must create a presentation including following details –</p> <ol style="list-style-type: none">1. Technology used2. About the project – Objective and features3. Actual working |
| 4. | Soft copy of the presentation and executable of the implementation / video or screen recording of the working project should be uploaded in the examination portal provided. (google classroom or any other) |

F.Y. B.Sc. INFORMATION TECHNOLOGY Syllabus Semester I & II

Scheme of Examinations

1. Two Internals of 20 marks each. Duration 30 min for each.
2. One External (Semester End Examination) of 60 marks. Duration: 2 hours.
3. Practical Examination for each subject at the end of Semester. Total five practical components, one each subject 50 marks each with separate passing out of 50
4. Minimum marks for passing the Theory and Practical Exam is 40 %.
5. Students must appear for at least one of the two Internal Tests to be eligible for the Semester End Examination.
6. A candidate will be allowed to appear for the practical examinations if he/she submits a certified journal of F.Y. B.Sc. Information Technology or a certificate from the Coordinator / Head of the Institute to the effect that the candidate has completed the practical course of F.Y. B.Sc. Information Technology as per the minimum requirements.
7. In case of loss of a journal, a candidate must produce a certificate from the Head of the department /Institute that the practical for the academic year were completed by the student. However, such a candidate will be allowed to appear for the practical examination, but the marks allotted for the journal will not be granted.
8. Decision of the coordinator, in consultation with the Principal, shall remain final and abiding to all.
